STRATEGIES TOWARDS INSTITUTIONALIZATION

CELIA M. REYES
CBMS NETWORK LEADER
2017 PEP MEETING, NAIROBI, KENYA
More than half of the local government units (LGUs) have adopted CBMS.

LGUs use their own resources to implementing CBMS.

The Department of Interior and Local Government (DILG) provides the training on the CBMS modules to the LGUs.

The CBMS Network Coordination Team (CBMS Team) based at DLSU-AKI Philippines provides capacity building to DILG trainers.

The CBMS Team continues to enhance the CBMS tools.
Coverage of CBMS Implementation in the Philippines as of February 13, 2017

- 77 provinces, 32 of which are province-wide,
- 903 municipalities
- 79 cities
- covering 24,676 barangays

At least 291 LGUs have more than 1 round of CBMS census (of which over 85 LGUs have at least 3 rounds of data collection)
STRATEGIES FOR INSTITUTIONALIZATION

- Find a good entry point.
- Identify ways to reduce costs of CBMS implementation
- Build capacity of local partners to use CBMS data
- Make tools (processing systems, mapping software, etc) available to the local partners
- Explore opportunities for funding from other sources
FIND A GOOD ENTRY POINT

- Determine needs of local partners and package CBMS as the solution to this need, while retaining the key features of CBMS.

- This means that you may need to “package” CBMS differently to different stakeholders.

- This also means that you need to constantly update the questionnaires and indicators that will be generated (example: from MDGs to SDGs).
REDUCE COSTS OF IMPLEMENTATION

- Identify who could be enumerators from the locality
- Use freeware
- Work with existing structures (offices)
BUILD CAPACITY OF LOCAL PARTNERS

- Engage those who will likely adopt the system as early as in the design stage
- Build their capacities during the project stage to ensure smooth transfer
- Use freeware
- Work with existing structures (offices)
MAKE TOOLS AVAILABLE TO LOCAL PARTNERS

- Use CBMS Network data capture, processing and mapping systems that can be shared with the local partners
- Develop your own tools that can be shared with the local partners after the project
EXPLORE ADDITIONAL SUPPORT

- Explore possible funding from other donors
- Currently, there is high demand for disaggregated data to monitor the SDGs. Explore possible interest of UNDP to support CBMS in localizing the SDGs
THANK YOU!
