Poverty maps generated from CBMS-NRDB

Outputs of CBMS-Argentina Team
PEP School on CBMS Poverty Mapping
March 14-18, 2011

Project Proponent: Instituto de Economía (IE)
Universidad Nacional del Centro de la Provincia de Buenos Aires (UNICEN)
Evolution 2002-2009: Proportion of People with income below the poverty threshold by province

Source: FIEL Estimation (Fundación de Investigaciones Económicas Latinoamericanas) based on EPH (Permanent Households Survey).
2009: Proportion of People with income below the poverty threshold by province

Although there has been a lot of improvement from 2002 crisis to 2009 the situation is not good enough, especially the northern part of the country have serious income problems.

Source: FIEL Estimation (Fundación de Investigaciones Económicas Latinoamericanas) based on EPH (Permanent Households Survey).
Evolution 2002-2009: Proportion of People with income below the subsistence threshold by province

Source: FIEL Estimation (Fundación de Investigaciones Económicas Latinoamericanas) based on EPH (Permanent Households Survey).
2009: Proportion of People with income below the subsistence threshold by province

Once again we can see that the northern part of the country have more problems in terms of income while the map gets greener as we go down to the southern part where the population is quite low.
