

PEP is a non-profit international organization that links researchers globally to enhance capacity for policy analysis in developing countries.

PEP research evidence contributes to informing national and international economic policy debates related to various aspects of development.

### Among PEP's distinctive features:

**Southern-based** global think tank linking a network of researchers and institutions

**Conducting** research on a broad range of economic policy issues using multi-dimensional analytical perspectives

**Fostering** cutting-edge research tools and methods to produce high quality evidence

**Supported** by world-renowned experts in development economics/policy research

**Generating** innovative development policy insights from a local perspective

**Developing** local capacity by providing a comprehensive support package and training to Southern analysts

**Inspiring** evidence-based policy solutions through policy engagement and dialogue

**Bridging** research to policy/action for inclusive growth and development impact

wishes to thank its main partners,

core donors,

and other collaborators

## Promoting contextualized policy solutions

**As a unique and renowned international research institution, PEP...**

- provides tools and methods for Southern experts to:
  - enhance their scientific skills and expertise
  - participate in major international policy research initiatives
  - establish their national and international reputation
  - pursue a rewarding career in policy research in the South
- provides resources for researchers, governments and development partners to:
  - obtain rigorous policy analysis, grounded in local perspectives
  - identify promising policy solutions, while understanding what works where (through comparative analysis)
  - promote evidence-based policy making, through engagement and dialogue
