Republic of the Philippines
Province of Batangas
Office of the Governor

Message

It is with great pride and pleasure that I convey my profound greetings to the officers and members of the Poverty and Economic Policy (PEP) - Community-Based Monitoring System (CBMS) Network as well as those who have been part of the effort to help the government in its fight against poverty. No matter how gigantic the task to be done as long as we join forces in forging a better future for our people, especially the poor, we can build a more empowered community with honor and dignity.

The current administration of the province is committed to the ideals that will promote policy advocacy to address human development. In the pursuit of its vision to uplift the living standards of the Batangueños, our government has made the HEARTS program as the center of governance. Health, Education and Environment, Agriculture, Roads and Infrastructure, Tourism, Technology and Security are the main focus to underscore the effectiveness of program implementation and efficiency in the use of resources. We employed in the process the CBMS as the tool in setting up a take off point and we realized the need for convergence to come out with a unified system to alleviate the poor from the bondage of poverty. The results are significant and the data gathered are strategic because the people behind the CBMS Project have been very dedicated to the noble mission of improving the lives of our people.

I would like to express my sincerest gratitude to the entire PEP-CBMS Network Team for the assistance you have extended to us. I also extend my warmest congratulations for the publication of this third volume of "The Many Faces of Poverty." It manifests a strong synergy among different groups that participated in the compilation of data and statistics to provide a picture of Batangas and six other provinces. I wish that with this common effort, we can inspire other people to become more productive in building a strong foundation for the future generation.

Mabuhay, more power, and God bless!

VILMA SANTOS-RECTO
Governor

The Many Faces of Poverty in Batangas

POPULATION

Batangas had a total population of 1,570,806 in 345,910 households[1]

The CBMS survey conducted in the province of Batangas during the period 2008-2010 covered 32 municipalities and 900 barangays. Among all the municipalities, the City of Tanauan is the largest in terms of population size, accounting for 8.3 percent of the province's total population, representing 135,237 individuals. The second largest municipality is Sto. Tomas with 6.7 percent while Nasugbu ranked third with 6.4 percent of the province's total population. Tingloy is the smallest municipality with only 1.0 percent of the total population. Of the population in the province, 38.2 percent belongs to those aged 16 years old and below.

HEALTH AND NUTRITION

The mortality rate of children 0–4 years is three in every 1,000

Among children 0–4 years old in the province, 0.3 percent died during the reference period. This corresponds to a total of 466 child deaths among children 4 years old and below. The highest proportion of child deaths was reported in the municipality of Mataasnakahoy where 0.6 percent of children 0–4 years old died. This is followed by San Nicolas and Lian, both of which recorded an estimate of 0.5 percent. Among all the barangays in the province, Barangay 5 (Poblacion) in Cuenca recorded the highest proportion at 5.0 percent although this represents only one case of child death. However, in terms of magnitude, the highest is reported in Barangay Darasa in the City of Darasa with 10 cases of deaths among children 0–4 years old.

One in every 1,000 pregnant women died due to pregnancy-related causes

Results of the CBMS survey also showed that 0.1 percent of pregnant women in the province died due to pregnancy-related causes. This corresponds to 30 cases of women deaths during the period. The municipal-level data showed that Tuy had the highest proportion of maternal deaths at 0.5 percent, which means that five died for every 1,000 pregnant women. The municipality of Calatagan ranked second (0.4%) while Santa Teresita (0.3%) and Lobo (0.3%) tied at the third position. No maternal death was recorded in 14 (out of 32) barangays in the province. Barangay Calumayin in Cuenca had the highest proportion of maternal deaths although it represents only one case. The number of maternal deaths ranged from 0 to 2 cases at the barangay level. Only three barangays recorded two cases of maternal deaths during the period. These include Barangay Hukay (Calatagan), Barangay Cawonga (Padre Garcia), and Barangay Wawa (Nasugbu). It may also be noted that 873 out of 900 barangays in the province had no case of maternal death based on the CBMS survey.

Two in every 100 children 0–5 years old were malnourished

Of children 0–5 years old in the province, 2.0 percent were classified as malnourished, representing 4,328 children. This translates to two malnourished children for every 100 children 5 years old and below. The municipality of Lian recorded the highest estimate at 6.0 percent, followed by Tuy with 5.6 percent and Talisay with 5.0 percent. Lian also recorded the most number of malnourished children with 324 cases. At the barangay level, malnourishment seemed to be a bigger concern. Some barangays recorded relatively high proportions of malnourished children. For instance, Barangay Tugtug in San Jose, which recorded the highest proportion of children classified as malnourished, had 39.8 percent. Barangay Balas in Talisay ranked second with 30.7 percent, followed by Poblacion Barangay 5 in the same municipality with 25.0 percent.

[1] Users of the data presented in this report are cautioned that due to some difficulties, CBMS was not carried out in the cities of Batangas and Lipa. The CBMS census was also not carried out in one barangay in the municipality of San Nicolas.

HOUSING

About 2.4 percent of households were living in makeshift housing while 2.3 percent were informal settlers

In terms of housing, CBMS data revealed that two in every 100 households in the province were living in makeshift housing. The municipality of Balete recorded the highest proportion of households living in makeshift housing with 6.7 percent, followed by Lian with 4.5 percent, and Nasugbu with 4.2 percent. Households living in makeshift housing seemed to be a bigger concern in some barangays. For instance, more than half or 54.1 percent of the households in Barangay Calawit in Balete were living in makeshift housing. In three other barangays, more than one-fifth of households were living in makeshift housing. These are Barangay Santa Elena (22.9%) in Santo Tomas, Barangay Bagong Tubig (22.7%) in Calaca, and Barangay Pulang Lupa (21.2%) in Mabini.

A few households or 2.3 percent in the province are also considered as informal settlers. Informal settling is most common in Malvar where 10.1 percent of the households were classified as informal settlers. Relatively high proportions of informal settlers were also recorded in Laurel (9.0%) and Nasugbu (6.4%).The latter also recorded the highest magnitude of informal settlers among all the municipalities in the province. Informal settling is also a big concern in several barangays in the province. For instance, almost all households (99.0%) in Barangay Pulang-Bato in San Nicolas were squatters. In addition, 70.0 percent of households in Barangay 2 (Poblacion) in Laurel were informal settlers.

WATER AND SANITATION

Access to safe water supply and sanitary toilet facilities is a concern for many households in the province

Based on the results of the CBMS survey, 5.6 percent or 19,252 households had no access to safe water supply. The municipality of Lobo had the worst condition in terms of water accessibility as 22.2 percent of its households were reported to have no access to safe water supply during the period. Taysan came next with 16.8 percent, followed by Tingloy with 15.8 percent. Disaggregated data further revealed that there are 33 "waterless"[2] barangays in the province out of the 900 barangays covered by the CBMS survey. It was also noted that all households in five barangays had no access to safe water supply. These include Barangays Magalang-Galang (Bauan), Santa Maria (Laurel), Leviste-Tubahan (Rosario), Matamis (Rosario), and Pulang-Bato (San Nicolas).

Meanwhile, 9.0 percent of the households in the province did not have access to sanitary toilet facilities. This means that nine in every 100 households were sanitation poor. Access to sanitary toilet facilities is a great concern for Tingloy where 26.5 percent of the households did not have access to such facilities. The proportion of sanitation poor is also relatively high in Tuy where 19.5 percent of the households had no access to sanitary toilet facilities while Lian also recorded 19.4 percent. At the barangay level, Barangay Pulang-Bato (86.5%) in San Nicolas recorded the highest proportion of households without access to sanitary toilet facilities, followed by Barangay Catmon (67.5%) in San Juan, and Barangay Calawit (61.8%) in Balete.

BASIC EDUCATION

About 10.8 percent of children 6 to16 years old were not in school

Results of the survey showed that 17.8 percent of children 6–12 years old were not in elementary school while 34.5 percent of children 13–16 years old were not in high school. The rate of school non-attendance is less among children 6–16 years old at 10.8 percent. This means that one in every 10 children 6–6 years old was not enrolled in school. The highest proportion of children 6–16 years old who were not attending school was recorded in Nasugbu (14.1%), followed by Lemery (12.9%), and Lian (12.8%). In terms of magnitude, Nasugbu ranked first with a total of 3,601 children 6–16 years old who were not in school. Higher school non-attendance rates were reported in several barangays in the province. For instance, Barangay Colvo in Bauan had 40.0 percent, which is the highest among all the barangays in the province, followed by Barangay 4 (Poblacion) in Nasugbu with 35.7 percent and Barangay Baybayin in Rosario with 35.0 percent.

[2] "Waterless" barangays refer to villages with less than 50 percent safe water supply coverage.

INCOME AND LIVELIHOOD

Four in every 10 households were income poor

Income poverty is also a major concern for the province as reflected in the high poverty rate. Among all households in the province, 42.9 percent were living below the poverty threshold. The municipality of Laurel had the highest proportion of households with no sufficient income to satisfy their basic food and non-food needs. Laurel ranked first with an income poverty rate of 66.8 percent, while Balete ranked second with 66.5 percent, followed by Agoncillo with 60.5 percent. At the barangay level, results showed that Barangay Paligawan in Balete had the highest proportion of income poor with 95.7 of the households living below the poverty line. Relatively high poverty rates were also recorded in Barangay Gulod (93.1%) in Laurel, and Barangay Tangob (92.4%) in Padre Garcia. Out of the 900 barangays, 327 were reported to have a poverty rate of at least 50 percent. This means that at least half of the households in these barangays suffered deprivation in terms of income.

About 26.5 percent of households had no sufficient income to satisfy their nutritional requirements

CBMS data also showed that more than a quarter of the households (26.5%) in the province were considered as food poor having no sufficient income to satisfy their basic nutritional requirements. Food poverty is most prevalent in the municipality of Balete where more than half of the households (51.1%) were food poor. Laurel and Agoncillo also had very high rates of food poverty where 49.6 percent and 45.7 percent of the households, respectively, were living below the food threshold. Barangay Paligawan in Balete recorded the highest proportion of food poor households among all the barangays in the province with a food poverty rate of 92.9 percent. This means that nine in every 10 households in the barangay had no sufficient income to satisfy their basic nutritional requirements. Barangay Tangob in Padre Garcia (87.3%) and Barangay Gulod in Laurel (86.7%) ranked second and third, respectively, in terms of food poverty.

About 0.4 percent of households experienced food shortage

Despite more than a quarter of the households in the province living below the food poverty threshold, only a small proportion of household suffered from hunger during the three-month period prior to the survey. Provincial data showed that 0.4 percent of the households experienced food shortage. This means that four in every 1,000 households suffered from hunger during the reference period. The highest proportion of households that suffered from hunger is recorded in Lian (1.4%), followed by the City of Tanauan (0.9%), and Balayan (0.8%). Several barangays reported even higher estimates. Barangay 9 (Poblacion) in Balayan recorded the highest proportion of households that experienced hunger at 10.9 percent, followed by Barangay 4 (Poblacion) in Laurel with 9.8 percent. Both Barangay Dominador in Alitagtag and Barangay Pagaspas in the City of Tanauan had 6.7 percent.

The province recorded an unemployment rate of 2.8 percent

Results of the survey showed 525,982 individuals who are members of the labor force, representing 33.5 of the total population in the province. Among the members of the labor force, only 2.8 percent were unemployed. CBMS data showed that across all municipalities, Santa Teresita recorded the highest unemployment rate at 5.8 percent, followed by Talisay (4.4%) and Tingloy (4.3%). At the barangay level, double-digit unemployment rates were reported in several barangays. In fact, 20 barangays had unemployment rates of at least 10 percent during the reference period. Barangay Poblacion in Lobo had the highest proportion of unemployed persons at 21.2 percent. Relatively high unemployment rates were also recorded in Barangay Anilao East (18.3%) in Mabini, and Barangay Orense (17.2%) in Bauan. They ranked second and third in terms having the highest unemployment rates in the province.

PEACE AND ORDER

About 0.1 percent of the population were victims of crime

Data on peace and order showed 971 individuals reported as victims of crime. This represents 0.1 percent of the total population in the province. Among all the municipalities, Mataasnakahoy recorded the highest proportion of crime victims with 0.3 percent, followed by Balayan and Calatagan, both of which had 0.2 percent. Only the municipality of Santa Rita recorded no crime during the reference period. Relatively higher proportions of crime victims were recorded in several barangays. The highest rate was reported in Poblacion 7 in Taal with 2.8 percent, followed by Barangay Dayap Itaas in Laurel with 1.7 percent. It is worth noting that of the 900 barangays in the province, 621 had no reported victims of crime during the reference period.

CBMS COMPOSITE INDICATOR AND MULTIDIMENSIONAL POVERTY

One of the 13 basic needs[3] was not satisfied by households, on the average

The province recorded a CBMS composite index (CCI) of 1.0, implying that households in the province have one unmet need, on the average. Households in Laurel have the worst condition or the highest among all the municipalities in terms of meeting the basic needs as reflected in its CCI of 1.7. Balete followed with a CCI of 1.6 while Lobo and Lian came next, both with a CCI of 1.4. Some barangays in the province exhibited generally worse conditions with Barangay Pulang-Bato in San Nicolas having a CCI of 4.6. This means that almost five of the basic needs were not satisfied by households in the barangay on the average. Barangay Matamis in Rosario ranked second with a CCI of 3.2. Three barangays ranked third, each with a CCI of 3.0. These are Barangay Bignay in Lobo, Barangay Calawit in Balete, and Barangay Makawayan in Tingloy.

About 13.9 percent of households in the province experienced multiple deprivations[4]

Results of the CBMS survey also showed that 13.9 percent of the households in the province were deprived in at least two dimensions. In fact, 10.3 percent were deprived in two dimensions while 2.9 percent were deprived in three dimensions. In addition, 0.7 percent of the households were deprived in 4–7 dimensions. Looking more closely at the different dimensions of poverty, CBMS data showed that 4.9 percent of the households were income poor and sanitation poor at the same time. Simultaneous deprivations in income and safe water supply were also reported by 2.2 percent of the households. It must be noted that 16,082 households in the province were income poor and education poor at the same time. Concurrent deprivation in income, sanitation, and education was also experienced by 3,790 households. In addition, simultaneous deprivation in income, safe water supply, and housing was also experienced by 1.1 percent of the households.

[3] This refers to household basic needs as reflected in the 13 CBMS core indicators which cover the following: (1) children 0-4 years old who died; 2) women who died due to pregnancy-related causes; (3) malnourished children 0-5 years old; (4) households living in makeshift housing; 5) households who are informal settlers; (6) households without access to safe water supply; (7) households without access to sanitary toilet facilities; (8) children 6-16 years old not in school; (9) households with income below the poverty threshold; (10) households with income below the food threshold; (11) households that experienced food shortage; (12) unemployment; and (13) victims of crime. A higher index would mean more unmet needs and hence, worse condition for the households.

[4] A household is considered to experience multiple deprivations if it is poor in at least two in the following dimensions: health, nutrition, tenure, housing, water, toilet, education, income, job and security.
